THE WHOLE SOLUTION

FOR CLIMATE CHANGE, POVERTY, HOMELESSNESS, & ALL SOCIAL, ECONOMIC & ENVIRONMENTAL CHALLENGES

Australian eco-social entrepreneur, Kathleen Earle, Founding Director of Katalyst Vision Group, Happy Planet Media, and Custodians Garden, today announced her invitation to **ALL GOVERNMENTS & ORGANIZATIONS** that sincerely want the solution for all the social, economic, and environmental challenges, to exemplify true leadership and make the healthy transition to an ecologically sustainable and prosperous Eco-social Living System ©.

Ms Earle invites the participating delegates of The United Nations Climate Change Conference in Bali to take immediate action and contact her for a preview of the **WHOLE SOLUTION** for climate change, poverty, homelessness, and all forms of environmental, social and economic challenges before high-level discussions on 12 December 2007.

Ms Earle, an authority on clean energy, said, "wealth and wellbeing live in the **WHOLE SOLUTION**. This invitation is to all governments and organizations that are genuinely committed to creating true wealth and wellbeing for their citizens and an ecologically sustainable world for humanity." Emission reduction or trading systems, mitigation schemes, technological innovation and transfer, clean coal and international conventions do not and will not deliver sustainable and healthy outcomes for people and planet, because such approaches overlook and undervalue the real cause of environmental, social and economic crises facing humanity.

Before the launch of Ms Earle's book in 2008, three (3) exclusive previews that reveal the cause and **CURE** of all social, economic, and environmental abuse have been scheduled in US, Australia, and UK during December 2007.

There is another option – a healthy and whole option. It's here. It's accessible. It's already being put into practice.

###

About Kathleen Earle: Kathleen Earle is a creative visionary, exemplary teacher, and eco-social entrepreneur with the remarkable ability to reveal the cause and CURE of all social, economic, and environmental abuse, and guide the healthy transition to an ecologically sustainable and nourishing socio-economic system.
